

Minutes of team meeting

Date: 2024-11-04

Attendees: Bruce, Dave

Meeting Notes

To discuss the questions that need to ask on First meeting with clients on 2024-11-05

Questions prepared for 2024-11-05 are as follows:

Who are the target users?

Which Oss (IOS, Android) should the app support?

Should it support different screen size / orientations and resolutions?

Should the app support data encryption for sensitive health information (weight, height, BMI, and heart rate zones)?

What information that “friends” can view(e.g. sex, age, activity records)?

- Q: Have an option to **enable / disable** some personal info (i.e. activity records, height, weight) for “**friend-only sharing**”?

- Q: What info can be still viewed by “friends”?

Are there any format restrictions for the attachments that users upload (e.g.photos, videos, audio recordings)?

- Video format for iPhone: .mov, .mp4, .m4v

What unit should be used for defining height and weight and calculating BMI?
